Quick Start Guide

This guide is a quick introduction to registering and maintaining records on ClinicalTrials.gov using the Protocol Registration and Results System (PRS).

1. **Change your password** - If you have not already done so, select Change Password from the Accounts menu on the Home page and complete the form.

2. **Create a record** - A study is registered in the ClinicalTrials.gov system by creating a protocol record. Select New Record on the Home page (either from Quick Links or the Records menu). Fill in a series of data entry pages.

   Tip: Data is saved as each page is filled in, so that you can "Quit" at any time, saving the record for later completion using the "Modify a record" instructions provided below.

3.
